Description

We are seeking a skilled and innovative Automotive Engineer to join our team. The successful candidate will design, develop, and improve vehicle systems and components, ensuring performance, safety, and efficiency. You will work closely with a multidisciplinary team to bring cutting-edge automotive solutions to life.

Responsibilities

Analyze data from tests and provide recommendations for system optimization.
Ensure compliance with industry standards and regulations.
Resolve engineering issues in existing vehicle designs or manufacturing processes.
Work with suppliers to source and integrate parts and materials.
Prepare technical reports and documentation for projects.
Stay updated with advancements in automotive technology and incorporate them into designs.

Qualifications

Education:
Bachelor’s degree in Automotive Engineering, Mechanical Engineering, or a related field.
Master’s degree or specialization in automotive systems is a plus.
Experience:
Proven experience in automotive design, testing, or manufacturing.
Proficiency in CAD software (e.g., AutoCAD, SolidWorks, or CATIA).

Job Benefits

Competitive salary based on experience and qualifications.
Health, dental, and vision insurance.
Retirement plans and performance bonuses.
Professional development and training opportunities.
Opportunities to work on innovative automotive technologies.
Relocation assistance (if applicable).
